Integrate.
MeridianLink, Inc.

MeridianLink Inc. is a CU Solutions Group technology partner and the developers of LoanDecision⁺ and Xpress Membership.

Technology Overview.

Integration with More Than 100 Third-party Vendors

MeridianLink's software applications have broad support among many loan industry leaders (data processors, imaging systems, insurance companies, Fannie Mae, Freddie Mac, etc.), which means tight integration with popular third-party products that will improve your work flow and efficiency.

Centralized IT

Bypass complicated software installation for easy dissemination of new features and fixes. Updates, new features and patches are automatically implemented with periodic system updates.

No Maintenance Required

Dual firewalls constantly run detection, prevention and reaction processes. In addition, MeridianLink's staff is trained to monitor system stability and security to ensure nothing jeopardizes system availability. The result is a worry-free system that is accessible to members and staff 24 hours a day, seven days a week.

Redundant Infrastructure with No Single Point of Failure

MeridianLink employs numerous fail-safe systems at their central processing center, including redundant database servers, redundant fiber optic connections to the Internet, and a real-time proprietary data backup system. A battery backup and gas generator ensure that power is available to your system in the event of a blackout. In addition, MeridianLink maintains a full mirror in Texas that can be brought online in a matter of minutes.

Controllable Remote Access

Protect access to your system through user and IP restrictions.

Web-based – No Additional Software or Hardware Required

MeridianLink's software applications require only a standard IE 5.5+ Web browser to perform all transactions and functions.

XML Open-architecture

Carefully designed with integration simplicity in mind, MeridianLink's XML open-architecture eases integration to any third-party or proprietary core processing solution.

SAS70 Type II and PCI

Third-party certifications ensure regular security audits and notification of security holes to maintain high standards. In addition, MeridianLink has implemented their own proprietary encryption module and dual firewalls to secure data storage.

Support a Paperless Environment

Enjoy a paperless working environment where you can capture signatures and archive forms and documents for quick retrieval. Since these files are stored remotely and backups are performed on a daily basis, you will never have to worry about losing your files. And by reducing the need for paper, printing supplies and office space, you will immediately realize the financial benefits of a paperless environment.

Business Intelligence

By providing quick access to critical, timely information to employees across your organization, MeridianLink's software enables scalable business intelligence. From executives to data entry clerks, every individual in your organization will be able to make decisions based on relevant data. The comprehensive integration, analysis and reporting capabilities of MeridianLink's software will enable you to extend the value of your existing applications, regardless of the underlying platform.

CUsolutions GROUP

About Us.

CU Solutions Group

CU Solutions Group helps its customers serve, grow and build financial strength by offering solutions that manage strategies pertaining to technology, marketing, membership enhancements and performance management.

Technology Solutions

Technology Solutions is a full-service technology company with solid expertise in Web, mass media, digital, data, programming and more. We help our clients leverage these tools to provide them with unparalleled access to all the resources they need to grow their organization from one source—Technology Solutions.

We are an SAS 70 certified and credit union-owned company that has been serving hundreds of credit unions and credit union organizations nationwide, and their technology needs, since 1996. We worked with an auditing firm to achieve SAS 70 Certification as a result of our commitment to the needs of our clients and efforts to manage our systems securely and effectively.

Technology Solutions offers:

- Web Design & Development
- Financial Education Content
- Automated Applications
- Member Communication Tools
