ComplySight

Empowering credit unions to simplify and systemize compliance oversight

Why choose ComplySight?

ComplySight is a user-friendly, web-based compliance management system that assists credit unions in managing ever-expanding compliance regulation. This self-evaluation tool empowers credit unions to assess their regulatory compliance risk and identify potential trends or areas of possible noncompliance for immediate corrective action. Users can assign compliance reviews/assignments and communicate those responsibilities through the system.

Integrating cross-functional compliance processes

With ComplySight, compliance is managed and monitored from a centralized resource serving as your credit union's compliance tool. ComplySight will help you stay on top of regulatory changes as new regulations or modifications to existing regulations become effective. The tool streamlines compliance

processes by delivering notifications and associated content to assist with compliance reviews, administration and a comprehensive complaint management system to track complaints to ensure responsiveness and responsibility.

Accelerating your credit union's compliance readiness

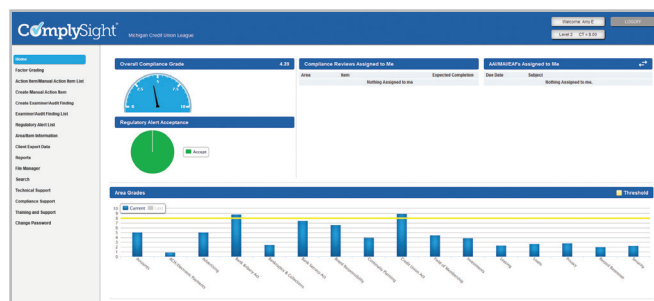

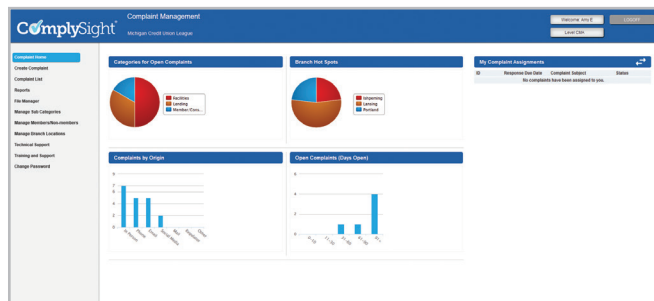

ComplySight cuts through the clutter of compliance by providing visibility, tracking, measuring and reporting for compliance activities through a single application. Leverage the power of ComplySight to be compliance ready. The platform assists in your organization's overall communication, prepares you for audits and exams, and delivers regulatory updates essential to maintaining credit union compliance.

ComplySight

Easy-to-navigate dashboard with dynamic reporting capability

Your organization needs a compliance program that fits your budget, one that can automate manual processes and provides oversight, collaboration and robust reporting. ComplySight is designed for credit unions to systematically monitor, track and manage compliance, integrating efficiencies to be more resilient in an environment confronted by disruption. As a comprehensive risk management tool, ComplySight helps credit unions stay organized while complying with evolving regulations. Dashboards are user friendly and display a credit union's compliance risk by areas of operation within the tasks/assignments that are pending completion.

ComplySight helps you stay on top of regulatory changes. When new regulations or changes to existing regulations become effective, you will receive notifications and associated content to assist with compliance reviews.
