

CU BOARD PORTAL

What your credit union needs: A board portal for your directors and staff, with all the essential tools

When it's time to possess a dynamic board portal for your board members and staff, look no further. With the CU Board Portal, the CU Solutions Group's Content Management System (CMS) offers everything credit unions need to manage an effective and proactive site.

The list is long, but success at a credit union hinges on some very critical issues, like:

- Being better prepared for board meetings
- Improvement of all board activities
- Simple and easy to use software for directors and staff

CU BOARD PORTAL

Responsive. Managed. Secure.

This fully integrated system puts you in command of your site, all the time, every time. Create your site to deliver information the way you want. Transform your site into a progressive member communication tool. Update your site to always stay competitive.

The secure site gives your credit union control over who can manage the site, what permissions they possess and who can view posted pages and documents. Bottom line: There are numerous features within the board/intranet site that give a credit union the tools and resources to effectively communicate information to their board members and staff.

Key features:

- Multi-page website w/Content Management System
- Branding for your credit union
- Articles module to create/organize articles or announcements
- Calendar of events module
- Blog module
- Ad banner management
- Polls module with a voting feature
- Discussion/Forum Module that allows attachments by the credit union and the board member or staff in the discussion thread
- Notification feature that allows notifications to be sent to specific groups as documents or as information is updated
- File manager so you may upload and organize documents, create folders and assign group permissions to files
- SSL Certificate
- Hosting services
